

Curriculum Vitae

Irene Janze

April 2018

Part 1 summary

PERSONAL DETAILS

Name: Ingrid Irene Janze
Nationality: Dutch
Place of birth: The Hague, Netherlands
Date of birth: March 3, 1956
Contact details: Buro *jan-ZE*
Niasstraat 299
1095 SG Amsterdam
Netherlands
Phone: + 31 (0)20 4190110; + 31 (0)6 44598066
email: info@burojanze.nl
website: www.burojanze.nl

EDUCATION

1993-1998: Visual Arts, Gerrit Rietveld Academie Amsterdam (School of Arts)
1995: Exchange program, video/performance, Chicago School of the Arts Institute
1992-1993: Painting and Photography, Vrije Akademie, The Hague
1991: Orientation course Visual Arts, Gerrit Rietveld Academie, Amsterdam
1986-1992: Political and social philosophy, external student, University of Amsterdam
1974-1982: Geology, major petrology, University of Amsterdam

Professional courses

2002-2003: Business course in art, Memo Amsterdam

CURRENT POSITIONS

- Independent artist, (1992 - to date)
- Artistic/ and creative director smARTcities and waste network (2016 – 2018)
- Huis der Afvalligen/ House for the Apostates (2015- to date)
- Owner artistic practice Buro *jan-ZE* (1999 - to date), www.burojanze.nl
- Member of the board of the "Grensgevallen" Foundation (Which explores the boundaries between science and art. www.grensgevallenstichting.eu (1999 - to date)

KEY PROFESSIONAL ACHIEVEMENTS

Artistic Practice

- Het Huis der Afvalligen (2015 – date)
workperiod Zeeburgerdijk 2016-workperiod Lolalik 2017- workperiod Vluchmaat 2018
- Artistic and creative director smARTcitiesandwaste network (2016-April 2018)
<http://www.smartcitiesandwaste.com/doku.php>
- Artistic and creative director, researcher and artist logolength laboratory, an installation on the Zuidas (2011 - September 2014), <http://www.logolengte.nl>(mostly written in Dutch)
- Coordinator and initiator: how long is a vestpocket parc in the Indonesian Neighborhood? (2009- 2014), <http://www.burojanze.nl/> click on the movies
- Guest researcher at the Free University of Amsterdam: LogoLength(2008 - 2010)
- Radio Orbino, a radio station next to the N242 highway in Alkmaar.
- (with Anton Dekker, 2007) <http://www.orbino.nl/content/project.php?id=8>

- Founder of Buro *jan-ZE*, more info www.burojanze.nl and *Stichting Grensgevallen* [Grensgevallen Foundation], <http://www.grensgevallen.eu> (1999-present)

Exhibitions

Over 90 artistic presentations, amongst them:

- smARTcitiesandwastenetwerk workshops, VU auditorium Amsterdam, Jan van Eyck academy Maastricht(2016), Middlesex University London, Bangor University , Wales, art installations and performances(2016-2017)
- The Opening of the Logolength Meter, art installation and performances (2013)
- LogoLengthLaboratory, art installation with a permanent performance, Open Zuidas Art Manifestation, Zuidas Amsterdam (2012)
- *Logolength: the position of the griffin*, mini installation, Virtueel Museum Zuidas Amsterdam, (2011);
- *NanoNomade*, W 139 Amsterdam (2008);
- *On the road: Radio Orbino*, University of Lancaster & alongside the N242 Alkmaar (2007);
- *Cityscape Rome*, Museum of History, St Petersburg, Russia (2006);
- *Nature & more*, Rotterdam (2004);
- *Gender democratic labyrinth*, Bonnefanten Library, Maastricht University (2003);
- *Cityscapeeast*, International Institute for Social History, Amsterdam (2002);
- *The Great Barrier Show*, former Bonnefanten museum, Maastricht (2001)

Artistic Research

- How long is a fallen? Hoe lang is een afvallige (2014-date)
- How long is a logo on the Zuidas? Logolength Zuidas (2008 – 2014)
- How long is the making of a VestPocket Parc? (2010- 2013)
- How long is Asphalt? (2007 - to date)
- How long is 2,5 km Highway? (2007)
- How long are the resonances of geological agencies in urban developments of Berlin, Amsterdam and Paris? (2006 - to date)
- Cityscape-east (1999 - 2006)
- Blueprint the Netherlands (1999 - 2008)
- Hyper textual space: the gender democratic labyrinth (2003)

Lectures

Over 30 lectures and readings, amongst them:

- Bangor University, Lecture: Dutch artists / “wasted people.”
Is there an impact of language on the actions and ways of dealing with waste and wasted people? October 2017
- Royal Geographical Society Exeter: presentation of the session "Waste narratives" of the Anthropocene. Developing models of arts –informed citizen science. September 3, 2015
Dr A.Plows, introducing an organic network, prof Greame Evans: Olympic Gold, F. Califate: Urban ethnography in the North of the urban south, prof M. Scoponi: Efficient recycling systems and bioplastics, I Janze: Sampling and mapping the Anthropocenic Leftoverlandscapes
- Chamber of Commerce, Amsterdam, presentation about social learning in the Urban Waste Mine: Europolis, March 17, 2014
- Maastricht University, Faculty of Arts and Social Sciences: Logolength Zuidas, Karen Barad and Hannah Arendt, BA Arts and Culture. MC year 2 Logo & Imago, May 7 2013, April 23 2014
- Royal Geographical Society London: The Ice and the Real Estate on the Zuidas in Amsterdam, September 2, 2011;
- Virtueel Museum Zuidas Air: *Logolength, the Ice the Real Estate on the Zuidas*, March 1, 2011;
- Stedelijk Museum Bouwkeet: *Where does Amsterdam East begin?* October 13, 2009;

- Amsterdam Bright City: *Logolength*, June 4, 2009;
- University of Lancaster, Palcom: *On the road: Radio Orbino*, November 5, 2007;
- St Peterburg Russia, Pro Arte Institute, *Cartography of the public space*, September 21, 2006;
- Witte de Wit, Rotterdam, *Cityscapeeast*, October 4, 2003

Relevant publications/papers

- *The Ice and the Real Estate on the Zuidas*, Life after Planning, special edition of Free Spaces Zuidas Air, March 1, 2011, pg 28,34
- *VU kenniskwartier*, Faculty of Arts, VU University Amsterdam, January 21, 2009
- *I am a NanoNomad in an artscape*, HTV de IJsborg nr 75, jg 12, 2008
- *The birth of radio Orbino as a heart shaped intra active slidingzone*, University of Lancaster, paper presentation 5-7 November 2007
- *Democratic transactions in the life sciences. A gender democratic labyrinth*, M Huijter and I Janze 2005. European Journal of Women's Studies, vol. 12, nr, 1, 9-29.
- *Cityscapeeast*, Irene Janze, Transgressie in de kunst, Jaarboek voor Esthetica 2004.

Teaching:

My teaching experience include international and national institutes at different levels (ranging from primary school to PhD) and workshops for random people passing by in public places where the workshops take place. (Children and adults)

Additional professional experiences

2015- to date	Marketer/ teleperformer
1995- 2002	Policymaker and project assistant Aids Foundation Netherlands
1989 - 2002	Counselor Aids Helpline, National Committee Against Aids
1989	Co-founder Foundation Medical Advice Collective
1988 - 1992	Lecturer conversation and attitude techniques for medical students, VU University Amsterdam
1986 - 1988	Amnesty International, maintaining the trade unions network, editorial member 'Verdrukt', A.I. monthly journal for the Dutch trade unions
1985 - 1988	Local policymaker and national representative trade union and labour conflict negotiator, OVB
1985 - 1986	Secretary Slotervaart Hospital
1982 - 1983	Reorganizer Library Faculty of Social Sciences, University of Amsterdam
1982	Research South Africa Committee.
1978 - 1981	bachelor teaching assistant geology, department of ore sciences, mineralogy and petrology, University of Amsterdam (GU)
1972 - 1988	several jobs like bartender, cook, mail sorter, interviewer etc

Other experiences

1983 - 1986 Journey through Europe and Asia

Awards and Honors

AHRC grant SmART Cities and Waste - Cross-Disciplinary International Research Network together with Alex Plows, Greame Evans and James Baker 2016-2017

The vest pocket park Soembawastreet has been nominated together with Stichting Postzegelparken for 'the orange apple' of the Oranje Fonds 2012. The Oranje Fonds is an endowment foundation and the largest in the area of social welfare in the Netherlands. It aims to promote participation in society.

Grant (10,000 €) by Fonds voor Beeldende Kunst(BKVB) for the pilot study *Logolengte Zuidas* with Prof G. Verstraete , VU 2009

Curriculum Vitae

Irene Janze

March 2013

Part 2 extension

RESEARCH OVERVIEW

In my work geological history blends with human history. Earth's crust, mud, meadows, water and wind are given the same attention as buildings, icons, asphalt and waste. I consider a location an agency in a multitude of worlds, worlds that in turn design the site. The place is stripped bare and built up again out of slices of information. My findings are expressed in installations, drawings, (video) performances, readings, catalogues and workshops. My installations are designed for a certain location or event, from which they draw meaning. They are '*matterrealities*' through and in which the public can dwell. In my artworks the location manifests itself as multi-dimensionality, fiction and experiment. They are 'three-dimensional' scripts, enabling the 'reader' to participate actively in the process of meaning. My artwork constitutes artistic research and enacts theoretical forms of investigation. Vice versa, the theoretical routes give birth to works of art.

The performativity of public space

Public space is not a passive environment in which people move around and activities occur, but an active 'doing' that takes part in the constitution of art interventions. Its performativity defines which art interventions are allowed and which are not and how the public should perceive them. Factors, like expectations, the scale and function of the public space, and its public image play a significant role in defining the characteristics and meanings of art interventions.

How long is an apostate or fallen/ Hoe lang is een afvallige (2014- current)

2016 – april 2017 Artistic and creative director smART cities and waste network

Primary aim: Interdisciplinary Knowledge exchange and capacity building: arts/science/policy/practitioners/ 'the public', through interactive workshops, art-interventions and social media

<http://www.smartcitiesandwaste.com/doku.php?>

2015 Preparation application AHRC fund with Alex Plows and Greame Evans and spreading out a network: SmART Cities and Waste - Cross-Disciplinary International Research Network.

Waste is a social problem as well as a techno- scientific one, and the solutions to waste will therefore also require innovative synergies between social/cultural, and techno/scientific, paradigms. Buro jan-ZE focuses on developing models of arts-informed citizen science; through catalysing the engagement of stakeholders, (social) scientists and citizens. This will be achieved through a number of innovative artistic interventions and workshops.

Preparation application AHRC fund with Alex Plows and Greame Evans and spreading out a network: SmART Cities and Waste - Cross-Disciplinary International Research Network. This cross-disciplinary Network proposal addresses the Highlight Notice through a strong leadership of arts & humanities researchers (PI/Co-I, practice-based artists) and an art & humanities informed research approach to cross-disciplinary working and knowledge sharing. Cross-disciplinarity will be promoted through the core team and engagement with social and physical sciences/ists who have been involved in the thematic development and current network proposal. Participation in networking activities will thus include scientists from biology/environmental science, history/philosophy of science, society-technology studies (STS), behavioural and related

fields, e.g. Smart Cities (including digital economy, internet of things) and stakeholders from public policy, government, industry and citizens. Finally, this research network will meet the challenge of arts-led engagement in the under-researched field of Waste, directly addressing the Highlight area of Cities/ Urbanisation/Urban Living and Smart Cities.

Thursday September 3 we presented a session at the Royal Geographical Society in Exeter called "Waste narratives" of the Anthropocene. Developing models of arts –informed citizen science.

Showroom: the House for the Apostates/ Huis der Afvalligen, Nieuwevaart 5-9 Amsterdam. Try outs, storytelling, sculptures and drawings, for invitees, July 25 and 26 2015

2014 *Cities As Waste Mines Research for Building Europolis*

Waste-3-2014 H2020 – a holistic approach to waste sorting in the urban environment, pre-processing followed by extraction of Critical Raw Materials and Minerals which is developed around the city of Amsterdam, but which can be translated to all the major industrial cities of Europe. Waste narratives & chronicles from local knowledge, gathered from the 4 test sites through ground activities but also collected through on line surveys. These are a set of ‘stories’ recording local knowledge but also embracing the involvement of local stakeholders in the Europolis innovation process. They are an artistic approach to the public participation process and use photos, drawings and other medium. In collaboration with Alex Plows, (Bangor University), Virginie Heidweiler (Geochem Research Amsterdam), James Baker (Selor EEIG)

In Europe, as elsewhere, waste is largely understood as a techno-scientific problem amenable to techno-scientific solutions. This points to a circular logic: engineering and science articulate the terms and parameters of waste problems such that each new problem tethers us to further solutions in the form of further techno-scientific innovations. As such, most attention is directed towards more and better diversion, better landfilling and repository technology, and the development of new waste management technologies. These solutions, as such, are not undesirable. But waste also involves the politics and economics of consumption; intergovernmental and industry-government relations; urban-rural divides; health; labor relations; gender and waste economies; cultural patterns of consumption, behavior and lifestyle; science-public relations; risk; governance; and so on – a bewildering array of factors, considerably beyond the remit of engineering and science.

Logo Length 'Zuidas'

LogoLength Zuidas is an artistic, mathematical research project.

The research:

Characterize the corporate logos by measuring their heights and dissect the logos into stories and images.

The aim is to change the general vision on the location and its logos.

The calculation:

The logolength formulae consists out of three components: the logo-height, the logo-speed(stories and images), the logo-force. $LL=lh + lv+ lf$

$$ll = lh + \left(\frac{\sum_{i=1}^n \left(\frac{(\log S_i) - \log s_i}{2 \log S} + \frac{\log(t_i + t_c)}{2 \log T} \right) g_i}{\sum_{i=1}^n abs(g_i)} \right) LH + \left((als\ lw < 6 \left| \left(\frac{(lw - 6)}{5} \right) LH \right| \right) \left((als\ lw \geq 6 \left| \left(\frac{(lw - 5)}{5} \right) LH \right| \right) \right)$$

A mathematical formula translates the three components in a number and calculates the length of the logo. Through a website the public can value the stories, images or deliver a story and hence influence the length of the logo.

The logolength-ratings:

Through a database we measure the variation in lengths.

The art intervention:

a/ An old house on the Zuid-as is transformed into an art installation: the logolength laboratory.

b/ A light installation on top of the building operates as a beacon and depicts the ratings

From 2009 and 2010 the pilot study of the research 'logolength' took place at the Free University (VU) in collaboration with Prof. G. Verstraete, prof J.E. Bosma and Prof J. Kolen, VU Amsterdam, Drs B. Gietema, mathematics, Drs E. Kraakman, webprogrammer and was co-sponsored by the Netherlands Foundation for Visual Arts, Design and Architecture, known in the Netherlands as Fonds BKVB. From 2011 the schoolwerktuin Dr Alma (school garden) and the municipality of Amsterdam Zuid provided the research with a building for a Logolength Laboratory (an art installation) on the Zuidas from where the research is now taking place independently. In the laboratory exhibitions, performances, guided tours and workshops take place. The lab closed in October 2014 and the project continues on the internet. www.logolengte.nl/ (mostly in Dutch)

The making of a vest pocket park, from a bench to "Studio Open Air"

In a poor residential area in Amsterdam a neglected, remnant piece of space next to a small parking lot was transformed from an addiction wilderness into a small park with a terrace and activities for children.

http://picasaweb.google.com/107491263977585049549/?gsessionid=5PjgbFpca6pm-Ppla_0uSQ

Asphalt cuts

Asphalt is the sedimentary rock of the (post) modern world. The project focuses on asphalt as a worldwide phenomenon and its local outcome.

Pieces of asphalt (highways) are sampled from all over the world. They are cut into thin slides (1-2mm) and glued on glass. Then they are made into small light boxes and provided with geographical coordinates.

Geological agencies in urban developments of Berlin, Amsterdam and Paris

Berlin

In geological and historical maps (records) I found that the western outline of the former Wall followed a specific geological layer in the "Mitte" (the city center) of Berlin. First of all, the characteristic sedimentation of the layer (stratum) had to become cognizable in relation to other layers. Historical maps show differences in cultivation next to a small nucleus of buildings along the stream valley of the Elbe. Properties of the subterranean become cognizable in relation to the cultivation of the fields. Subsequently houses and streets were built alongside and next to the differentiated fields.

The latest political (East-West) Wall followed what remained of the route of the 'ancient' wall from the Leipzigerplatz, northward into the Königgratzerstraße. There it went around a former drill terrain, located on diluvial sediments, as the city grew larger. The wall followed the layer consisting of alluvial sand and clay deposits and some dune sand (between the upper diluvium and the alluvium) to finally cross the marl hills at the Bernauerstraße. Dynamics of cultivation stimulate the subterranean to develop a property - and a difference in use - of the 'stratum'. It influenced where the wall was eventually built.

So once upon a time, a very long time ago, a river deposited sand. That sand layer co-produced over time, the position and direction of a political division between the east and the west in the world: the Berlin wall. With the help of GIS historical and geological maps were produced and put upon 'Google Earth.' With the use of the button 'transparent' it is easy to see how the geomorphology plays an important role in the

development of the cityscape and the Wall of Berlin.

Amsterdam

The (economic) division between East and West Amsterdam more or less follows the river Amstel. The Amstel started as a peat river and approximately follows the slope of the ice cap of Amsterdam. The way Amsterdam materializes is closely related to geological actors - wind, rivers, ice and subterranean substances. In Amsterdam they are the main producers of the newly built international business district in the South of Amsterdam, the Zuidas. The research shows that ice of the Saalian (roughly 150000 years ago) created a basin that got filled up with sand and clay. GIS mapping shows that the Zuidas, borders the boulder clay in the soil: the footprint of the glacier. It is the locus of the terminal moraine. The basin and the end moraine provided for great grounds for high peat to settle and pile up. The peat moor influenced a lucrative and moneymaking area in Amsterdam with a great infrastructure. Above the push moraine the west wind blew the thin layer of peat away. A lake emerged. Reclaimed the soil above the push moraine made poor farmland, but was a great place for an international airport. The international airport together with the great infrastructure formed a great location for international, service businesses. The Zuidas was born. The shape of the Zuidas follows the old east/west orientated lots and drainage ditches of the polder. The research shows how the Amsterdam glacier basin and the ever chilly and persistent west wind dictate the organization at the surface.

Paris In preparation

Cityscapeeast

Cityscapeeast is a project about changes in the public domain of urban landscapes. Lectures and catalogues show were *Cityscapeeast* participants collected data for their work. The lectures and catalogues are produced alongside exhibitions of *Cityscapeeast* artworks, and should be considered as a part of the *Cityscapeeast* - art performance. The project started out in 1999 and concerned itself then with the change in eastern parts of town in North European cities. Due to the dominant western wind in the North of Europe in the industrial era these parts mainly used to be characterized by shipyards, stinking industry and cheap working-class neighborhoods. In the digital era they were facelifted.

All *Cityscapeeast*'s artworks look at local components of (inter) national events. These events are considered as actions and can be read through the effects they had/have in the material world.

Cityscapeeast visited several locations: "Indonesian District Amsterdam April 2000"; "Dam Amsterdam 270102022002"; "WTCA - Fresh Kills New York City 151020102002"; "Peace Palace the Hague 250303102004"; "Berlin - Dorfheide 010507052004"; "Javastreet Amsterdam 2003/2004/2005"; "Javastreet Tilburg 31012004"; "Rome 070409042005"; "Berlin - Dorfheide April 29 - June 5 2005", "Javastreet the Hague November 2005", "Ireland in between Coumeenoole South and Ferritersquarter May 2006".

More info @ <http://www.burojanze.nl/cityscapeeast/english.html> (2002) and www.burojanze.nl/cityscapeeast/berlijn/lecture%20berlin.html (2005)

Blueprint the Netherlands

The performativity of installations in the public space. Through my installations spaces are reconfigured in geo(morpho)logical and historical places. Meaning shifts all the time.

An example of an installation as an intervention in public space is Radio Orbino

Abstract:

<http://www.burojanze.nl/asphalt%20radio%20orbino/abstract%20ro%20website.pdf>

and a long version:

<http://www.burojanze.nl/asphalt%20radio%20orbino/birth%20of%20radio%20orbino%20website.pdf>

Democratic places: The gender democratic labyrinth.

Is it possible to create a spatial grammar that attributes to democratic processes?

The gender democratic labyrinth was an artistic and political experiment as an effort to advance democratic transactions in the life sciences. Under my supervision artists built a 'gender democratic labyrinth' in Maastricht, in which scientists, women's groups, people in general, artists, philosophers, politicians, journalists, clinical geneticists and many others interacted and negotiated on the creation of human embryos for medical-scientific research (a subject kept open in the Dutch Embryo Law of September 2002 to decide within a few years). By taking a gender perspective on the process of democratizing science, we [M. Huijer and myself] aimed to create a space in which itinerary and difference are constitutive elements in the public exchanges on science and technology. The idea to build a labyrinth was theoretically based on a notion of agnostic democracy and on a notion of science and technology as being contextualized and socialized. The labyrinth was constructed as a physical fabric of texts and signs (that is to say spoken and written language, images and sounds) based on the concept of hypertext as described by Ted Nelson. Ted Nelson introduced the term hypertext in 1956: *by "hypertext" I mean non-sequential writing-text that branches and allows choices to the reader, best read at an interactive screen. As popularly conceived, this is a series of text chunks connected by links which offer the reader different pathways.*

The organizing principle of the labyrinth: a random sequence of texts, each text representing a card from a Filofax system, which is randomly distributed to its 'readers'. This refers to an important feature of a hypertext as described by Landow. There is no text with paragraphs, notes, or contents. In a hypertext, all text parts are connected and it is not possible to distinguish between a main contribution and a marginal one. Landow describes it as follows: *Hypertext [...] emphasizes that the marginal has to offer as much as does the central by refusing to grant centrality to anything [...] In hypertext, centrality, like beauty and relevance, resides in the mind of the beholder.* Landow, G. P. (1992) *Hypertext: The Convergence of Contemporary Critical Theory and Technology*. Baltimore: Johns Hopkins University Press.

The shape of the labyrinth and the sequence of the performances linked the sets of text-fragments. The user was given the possibility to walk through the text in several ways (as an exploratory hypertext). By creating three entrances the participants were able to log in at different positions. The 'live' chat boxes allowed the users to make changes in the texts as in a constructive hypertext structure. The routes of the participants differed. The participants were able to leave the labyrinth at various places. The amount of the proposed text was enormous. It was impossible to attend all presentations. To avoid completeness of offered information five presentations took place at the same time. The choice for a particular presentation excluded parts from other texts. Participants in the labyrinth traveled in the same text/image space, but could not assume to have heard or seen the same texts fragments or images.

Concept: Grensgevallen Foundation: L. Hin (director). M. Huijer (scientific concept), I. Janze (artistic concept)

EXHIBITIONS/performances

1. 2018: building a Tiny studio at the Vluchtmaat
2. all year round once a week on Wednesday :Vluchtheuvel, building an installation in front of the Lolalik (from the first workshop; a “babylonical conversation”, een babylonische samenspraak, the Tables of Babel emerged. We looked for waste materials in and around the former prison, now a refugee centre and started building tables. By doing so we met people who suggested tables, told us their stories or gave us rest materials to built with. Through the meetings and with the materials the VLUCHTHEUVEL as we now call it changed.)
